POWER SUPPLY TO CONSUMERS OF ELECTRICAL ENERGY.

As the public are aware, the enforced cut on power supply to industrial installations has been restored fully from the morning of Sunday the 4th June 1950. Unrestricted power supply is being made available to all installations throughout the State. In as much as the flow in the Cauvery and Kabini has improved considerably and indications are that the south-west monsoon has set in, it may safely be stated that the power position has improved.

Due to failure of monsoon last year and complete failure of pre-monsoon rains during March and April, the flow of water in the Cauvery and Kabini dwindled considerably. By the end of north-east monsoon last year, it was apparent that the Reservoir would not be able to meet the usual demand both for power and irrigation. In order to reduce the demand for power purposes on the limited resources of the Reservoir, the Department arranged to make Jog power available to areas served from the Receiving Station at Mysore City. Thus the discharge, as measured at Sivasamudram, was reduced to 960 cusecs with effect from 29th December 1949 against 1300 cusecs that had to be maintained, if the two generating stations, *viz.*, Sivasamudram and Shimsha, were to meet the demand of Mysore, Bangalore and Kolar Gold Field. By the use of 960 cusecs of water, it was possible to meet the normal full demand of Bangalore and Kolar Gold Field Areas, feeding Mysore area from Jog power. Even though the flow in the two rivers, *viz.*, Cauvery and Kabini, dwindled, the above load was carried by the two stations with the hope that freshets would come in and would last till the monsoons set in. Unfortunately these expectations did not materialise with the result that a cut in power supply in the two areas served by Sivasamudram and Shimsha had to be effected.

Accordingly, on the 21st April 1950, a small curtailment was effected to suit the conditions of water flow in the river as mrasured at Sivasamudram. From 24th April to 30th April, 33-1/3 per cent cut was imposed in the case of large installations. Even then, the expected freshets did not come and the water flow conditions in the two rivers worsened with the result that, from the 1st May to 8th May, fifty per cent cut was imposed. The conditions grew worse and a notification was issued curtailing power supply by 75 per cent from 9th May onwards. Fortunately a little improvement occurred in the flow in the Kabini and the 75 per cent cut announced was not brought into effect, but the 50 per cent cut had to be continued. Between 11th and 12th May a few rains in the catchment area of the Kabini brought in fresh water, which had to be allowed to flow on to Sivasamudram, as there was no place for its storage. In order to utilise this water fully, the consumers of power were requested to put in full load with effect from 13th May till the water in the river lasts. This lasted till the 23rd May 1950. Again the drought continued and demanded a curtailment of power supply by 50 per cent, which was given effect to from 23rd May to 3rd June, both days inclusive. Due to improvement in the flow of water in the Kabini river, the cut was restored and all the power installations were requested to resume full load with effect from the morning of Sunday the 4th June 1950.

In this connection, it may be mentioned that even though very limited quantity of water was available in the Cauvery, as measured at Sivasamudram, it was possible to carry 50 per cent load in these areas by making elaborate arrangements for delivering Jog power to consumers in Chikballapur, Doddballapur, Tumkur, Goribidnur, Chennapatna, Kankanalli, Hindustan Aircraft and Tippagondanahalli Pumping Station, and also a part of Civil Station served by the 'C' Station situated near the Cantonment Railway Station was supplied with Jog Power. In short, the demand on the two stations, *viz.*, Sivasamudram and Shimsha, was reduced to a minimum by supplying to the maximum extent possible and practicable from Jog.

Briefly, the cut was started on the 21st April and ended by 3rd June 1950, *i.e.*, for a period of 44 days, in which 33 1/3 per cent cut was effected for a period of 10 days, for a period of 9 days the cut was resorted fully and during the balance of the period of 25 days, the 50 per cent cut was enforced. Kolar Gold Field Mines had to be completely shut down for only two days, *i.e.*, on the 31st May and 1st June.

The curtailment to the extent of 50 per cent in some cases was found necessary, as power for essential requirements, such as water supply, domestic consumption, etc., had to be fully met.

In this connection, the Electrical Department wishes to express its appreciation of the ready and willing co-operation of the consumers of power exhibited during the most difficult times we have passed through during the above period.

NATIONAL TREE PLANTING WEEK.

On several occasions in the past, the need for planting trees, whose value in the general economy of the country is of the utmost importance, has been often stressed on the people. It has been usual in this State to commemorate important State festivals like the Birthday of His Highness the Maharaja or the Dasara by planting trees through the agency of the children in schools, students in colleges, scouts, joint action of officials and non-officials alike in the rural areas, etc. In spite of this, however, there has been a good deal of denudation of trees from the hill sides and plains alike leading not only to erosion of the soil but to progressive diminution of rainfall and general deterioration of climatic conditions. It has been felt that special attention should be devoted to arrest this tendency. Last year, in response to a call from the Government of India, a special planting drive was undertaken. Liberal prizes were offered to Panchayets which planted the largest number of trees. The planting season was fixed from July to August and more than fifteen lakhs of seedlings were planted all over the State. Village Panchayets, Municipalities, Sanitary Boards, Rural Development Committees, Boy Scouts and Seva Dals, and students of Educational Institutions, all took part in this campaign. It is unfortunate that for lack of adequate rainfall and sometimes on account of neglect, many of the plants did not come up. But what was achieved represents a substantial progress.

The Government of India have now made a special appeal that this Planting Season may be observed by an intensive drive for planting of trees all over the country. It has been pointed out that trees are of the utmost importance in the national economy, firstly, because they are of great value in securing adequate rainfall and proper climatic conditions, secondly, preventing erosion of the soil, thirdly providing many economic benefits to the people by way of fruits, flowers and timber, fourthly, because they play a vital part in the cultural life of the Nation. The wanton destruction of the vegetable cover of the soil has to be stopped at once and the conscience of the people awakened regarding the incalculable value of plant growth and the great danger caused by its denudation.

Experience has shown that while it may not be difficult to secure planting of trees on a large scale, the most difficult portion of the work is their maintenance. Proper arrangements have to be made not only for timely planting but for

and by watering during the hot weather. It will be a waste of effort if large-scale planting is done without adeqaute measures for maintenance.

The Government of India have, therefore, desired that planting should be started in the first week of July and that the period should be observed as the National Tree Planting Week. The Festival which should be celebrated all over the country will hereafter be an annual feature, and a suggestion has been made that it should be called "Vanamahotsava."

The Government of Mysore have already taken steps on 27th April 1950 to inaugurate a "Tree Planting Campaign" from 1st July 1950. Arrangements have been made to provide seedlings, plants, etc., to the Deputy Commissioners of Districts for distribution in rural areas and even grafted fruit and other plants have been arranged to be supplied at cost price. Liberal rewards have been offered to Panchayets and individuals, who plant the largest number of trees in the districts and a sum of Rs. 10,000 has been allotted for the purpose. Reports have been received that arrangements for digging pits, etc., have already commenced. A special appeal has been made to educational institutions, Seva Dals, Scouts and other organisations to take part in the campaign and plant as many trees as possible and maintain them. Officers of the Horticultural, Agricultural, Rural Development and Forest Department, have been requested to co-ordinate their efforts and to make arrangements for the selection of suitable plots for planting, give instructions regarding the kind of seedlings to be planted, to arrange for their transport and supervise and guide the planting work. Instructions have also been issued to the Public Works Department Officers to undertake planting of avenue trees on both the sides of the roads, river and tank channels. Government appeal to the public to co-operate in this campaign and arrange for as many trees as possible being planted not only in the compounds of Government buildings, court houses, etc., but also in the compounds of private bungalows, gardens, village panchayet yards, tank contours, village waste lands, canal banks, roadside and railway lands and most of all in the fields of the cultivators themselves. It has to be stressed in this connection that even more important than planting of the trees is their maintenance. After-care and protection till the trees are mature enough to be beyond the reach of damage by cattle is of the greatest importance. Tree guards made out of thorns provide cheap and effective means of protection.

The Government of Mysore trust that the public will co-operate in making the celebration of the "Vanamahotsava" in July 1950 a great success. All officers and Development Committees will pay special attention to this work. Officers concerned will take special measures to establish seed stores and nurseries for the distribution of seed and seedlings wherever necessary. Heads of Departments and other officers at district and taluk levels may form small committees to help in the work if necessary. Reports of progress in this work should be submitted periodically to Government through the Commissioner for Rural Development. It is hoped that planting trees this season will reach a new record figure, and serve as a landmark in national conservation.
